

# An EV Ready Community

Rangeview by Genstar is at the forefront of the electric vehicle movement by creating one of Calgary's first EV ready communities.

## What does this mean?

During construction, every home in Rangeview has conduits installed leading to the roof and garage for easy installation of solar panels and an electric car charger.

Solar Energy  
Usage

Cleaner  
community air

More attractive  
for resale

Save money  
on gas

Artist rendering only. Solar panels and charging stations not included. Information is subject to change.

Calgary has an average of **333 sunny days per year**, by installing solar panels and a charging station in your EV ready home, homeowners can power their car with clean, and sustainable energy.
